## Title 24—Housing and Urban Development

## CHAPTER II—OFFICE OF ASSISTANT SECRETARY FOR HOUSING PRODUCTION AND MORTGAGE CREDIT—FEDERAL HOUSING COMMISSIONER (FEDERAL HOUSING ADMINISTRATION), DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. R-74-267]

## PART 275—LOW RENT PUBLIC HOUSING

### Prototype Cost Limits for Public Housing

On Friday, June 8, 1973, the Department published (38 FR 15051) prototype per unit cost schedules for low-rent public housing pursuant to section 15(5) of the U.S. Housing Act of 1937. Subsequent to initial publication, the schedules were revised whenever it was found that all or part of the costs for a given area were unworkable.

Section 15(5) of the act further provides that the prototype costs be determined at least annually and specifies that the costs are not effective until published in the FEDERAL REGISTER. Continuity of contract approvals therefore requires publication of these updated schedules for immediate effectiveness.

We believe also that the need for current prototype cost schedules outweighs, in this instance, the advantages of the customary notice of rulemaking and comment procedure, particularly since the updating of these costs is based not only upon information developed in HUD field offices but upon requests for change submitted by the public as well. Although these schedules will be effective upon publication, timely written comments will nevertheless be considered in preparing revisions to costs limits for individual areas, such revisions to be published in the FEDERAL REGISTER on or before July 1, 1974 and at such time thereafter as the Department finds necessary. Comments with respect to cost limits for a given location may be filed with the appropriate HUD area office.

APPENDIX—PROTOTYPE COST LIMIT FOR PUBLIC HOUSING

(Sec. 209 of the Housing and Urban Development Act of 1970, Public Law 91-609, sec. 15(5) of the U.S. Housing Act of 1937, 50 Stat. 888, 42 U.S.C. 1401 et seq.; sec. 7(d) of the Department of HUD Act, 3535(d); and Secretary's delegation of authority, published at 36 FR 5007, Mar. 16, 1971)

A. *Unit prototype cost.* 1. Prototype cost comprises the cost of dwelling structures, account no. 1460, and dwelling equipment, account no. 1465, as described in "Low-Rent Housing Accounting Handbook 7510.1," chapter 3, section 15, which include their prorata share of the builders' fee and overhead, insurance, social security, sales tax, and bonds.

2. Prototype cost does not include the costs of site acquisition, site improvement, nondwelling structures or spaces (and equipment), planning (architectural-engineering fees, permit fees, inspection, and similar costs), relocation, interest or local authority administrative costs, all of which are described in "Low-Rent Housing Accounting Handbook 7510.1," chapter 3, section 15.

3. Prototype cost takes into account compliance with applicable HUD Minimum Property Standards and planning and design criteria described in HUD Handbook 7410.1, chapter 3. Current copies of HUD Handbooks are maintained and available for public inspection in the Office of Public Information, room 1202, Department of Housing and Urban Development, 451 Seventh Street, S.W., Washington, D.C. 20410, and in each of the Department's regional, area and FHA insuring offices.

4. Prototype cost takes into account the extra durability required for economical maintenance of assisted housing and the provision of amenities designed to guarantee safe and healthy family life and neighborhood environment.

B. *Project prototype costs.* 1. The project prototype cost is the sum of the unit prototype costs for the dwellings of various sizes and types comprising the project. The total cost of dwelling construction and equipment (accounts 1460 and 1465), and the related proportionate share of the contingency established by any development cost budget shall not exceed the sum of 105 percent of the project prototype costs for the dwellings to be constructed.

2. A request for approval of a cost which exceeds the 105 percent cost limitation but which is not in excess of the statutory 110 percent may be submitted to the Regional Administrator. Such requests must be supported by a detailed justification with respect to the particular project, taking into account all of the circumstances involved and demonstrating that such approval is necessary and desirable in carrying out the objectives of the act.

3. If it is found at anytime between annual updates that all or part of the current prototype costs for an area office jurisdiction are unworkable, the procedures outlined in HUD Handbooks 7410.1 and 7410.2 (1-74) will be followed for requesting revisions.

4. Development cost budgets, awards of main construction—contracts, preliminary contracts of sale, and contracts of sale for turnkey projects will not be approved unless an appropriate prototype cost for the area is published in the FEDERAL REGISTER.

*Effective date.* This rule shall be effective on May 17, 1974.

SHELDON B. LUBAR,
*Assistant Secretary-Commissioner.*
